

## Biomedical Corporate Intelligence

...for business development  
and financial professionals

**MedTRACK** is a proven corporate intelligence tool for business development officers, librarians and executives of biomedical companies, as well as vendors and consultants who serve those companies. Furthermore, the financial industry relies on our **MedTRACK-based custom research** to gain insight into company fundamentals, and respond with educated agility to market news.

### About MedTRACK

Pipeline and financial data on 11,200+ biomedical companies worldwide.

MedTRACK is the most comprehensive database of private and public biomedical companies. MedTRACK contains pipeline, financial, competitive product, mechanism and mode of action, partnering and patent information on more than 11,200 biomedical companies worldwide. The information can be sorted by parameters such as disease, competitive products or clinical trial stage. Search functions reach into SEC filings, websites, business and product descriptions, select literature, news and announcements. A well-furnished toolbox makes it easy to find the data you want.

## Other MedTRACK Products

### **MedTRACK Deals & Alliances**

The D&A database provides comprehensive coverage of licensing agreements and other deals by more than 11,200 biomedical companies covered in MedTRACK. Over 34,900 deals can be searched by company or product name, keyword, financial terms, product v. technology, and more.

### **MedTRACK Venture Finance**

The Venture Finance Database provides an in-depth coverage of 8,157 Venture transactions as well as other details for 3,444 biomedical companies covered within MedTRACK. One of its features allows search-ability for the most up-to-date news regarding Venture Financings. Other pertinent search features include transaction categories, financing rounds, security types, and therapeutic areas.

### **MedTRACK Epidemiology**

The Epidemiology hub is a comprehensive database offering current, accurate, and reliable epidemiological information on more than 765 indications, procedures, and conditions. Content includes incidence, prevalence, morbidity, mortality and population-based projections in selected countries. Each profile also includes a description of the indication, definitions and a detailed methodology.

### **MedTRACK Japan**

MedTRACK Japan offers a suite of hubs that include information on Japanese pharmaceutical and biotech companies as well as their products. Hubs include a disease center, geographical or keyword search, news manager, report center, and screener. Tracking 324 companies, the database also covers information on 5,427 products, 1,699 deals, and 2,805 management contacts.

### **MedTRACK Custom Research Solutions**

Our professionals are available for customized research on a per-project basis.
